Portfolio

## Professional Summary

Full-Stack MERN & GenAI Developer with experience building scalable web platforms, RESTful APIs, and LLM-powered systems. Developed AidME (© 2025), a copyrighted telemedicine product with real-time video, AI automation, and secure architecture.

## Education

PCET's Pimpri Chinchwad College of Engineering Research

Bachelor of Engineering (B.E.) in Computer Science and Engineering

Nov 2022 – May 2026

GPA: 8.66 / 10 (Top 10%)

## Technical Skills

|                           |                                                                                              |
|---------------------------|----------------------------------------------------------------------------------------------|
| Frontend:                 | React.js, HTML5, CSS3, JavaScript (ES6+)                                                     |
| Backend & Databases:      | Node.js, Express.js, RESTful APIs, JWT Authentication, MongoDB, SQL, Redis                   |
| Programming Languages:    | C++, Python                                                                                  |
| Tools & DevOps:           | Git, GitHub, Postman, VS Code, Docker, CI/CD, Agile                                          |
| Machine Learning & GenAI: | Generative AI (LLMs, RAG, LangChain), Hugging Face Transformers, scikit-learn, Pandas, NumPy |

## Work Experience

Back End Developer – Celebal Technologies [\(Link\)](#)

May 2025 – Jul 2025

- Designed and implemented scalable RESTful APIs using Node.js and Express, enabling seamless communication between frontend and integrated backend microservices and reducing response time by 60% for over 100 concurrent users.
- Integrated backend microservices and optimized database queries, resulting in an 80% improvement in overall system performance and response time.

MERN Stack Intern – i2ispecialist Technologies Pvt. Ltd. [\(Link\)](#)

Dec 2024 – May 2025

- Developed a full-stack E-Commerce application with secure JWT-based role access control for admins and users, reducing unauthorized access by 90%. Improved database performance by 3× during peak load through MongoDB indexing and query optimization.

## Projects

AidME – Smart Medical Assistant [\(GitHub\)](#)

Mar 2025 - Present

Founder & Developer — © 2025 Anand More

- Built a MERN-based telemedicine app with secure video consultations and real-time analytics health dashboards
- Integrated Large Language Models for instant prescription generation, reducing manual effort by 70% and response time to 5s.

Farmax Agro – AI-Driven Sustainable Farming Platform [\(Github\)](#)

Jun 2025 - Present

- Analyzed a multi-agent AI system using Node.js, ML models, and MongoDB to optimize farming practices and reduce resource usage by 30%.
- Implemented real-time weather prediction and crop recommendation for sustainable agriculture.

## Achievements & Certifications

- Cavista Hackathon (Top 10% Finalist): Led full-stack AI project in Inventory Management. [\(Certificate\)](#)
- IBM SkillsBuild: Certifications in Cloud Computing and Web Development Fundamentals. [\(Link1\)](#) / [\(Link2\)](#)
- Oracle & MongoDB: Certified in SQL and MongoDB. [\(SQL & MongoDB\)](#)
- Python, C++ IIT Bombay: Completed 30+ hours of training in OOPs with strong conceptual understanding. [\(Link1\)](#) / [\(Link2\)](#)
