Professional Summary

Full Stack Developer skilled in MERN stack and Generative AI (LLMs, RAG). Built a telemedicine platform with secure video calls and AI-driven prescriptions. Designed REST APIs, optimized MongoDB for performance, and developed apps with React and Node.js. Enhanced coding proficiency by solving 160+ LeetCode problems in C++ and Python.

Education

PCET's Pimpri Chinchwad College of Engineering Research
B.E in Computer Science and Engineering

Nov 2022 – May 2026
GPA: 8.66 / 10 (Top 10%)

Technical Skills

Frontend:	React.js, HTML5, CSS3, JavaScript (ES6+)
Backend & Databases:	Node.js, Express.js, RESTful APIs, JWT Authentication, MongoDB, SQL, Redis
Programming Languages:	C++, Python
Tools & DevOps:	Git, GitHub, Postman, VS Code, Docker, CI/CD, Agile
Machine Learning & GenAI:	Generative AI (LLMs, RAG, LangChain), Hugging Face Transformers, scikit-learn, Pandas, NumPy

Work Experience

Back End Developer – Celebal Technologies [\(Link\)](#) May 2025 – Jul 2025

- Designed and implemented scalable RESTful APIs using Node.js and Express, enabling seamless communication between frontend and integrated backend microservices and reducing response time by 60% for over 100 concurrent users.
- Integrated backend microservices and optimized database queries, resulting in an 80% improvement in overall system performance and response time.

MERN Stack Intern – i2ispecialist Technologies Pvt. Ltd. [\(Link\)](#) Dec 2024 – May 2025

- Developed a full-stack E-Commerce application with secure JWT-based role access control for admins and users, reducing unauthorized access by 90%.
- Improved database performance by 3× during peak load through MongoDB indexing and query optimization.

Projects

AidME – Smart Medical Assistant [\(Github\)](#) Mar 2025 - Present

- Built a MERN-based telemedicine app with secure video consultations and real-time analytics health dashboards
- Integrated Large Language Models (LLMs) for instant prescription generation, reducing manual effort by 70% and response time to 5s.

Weather Prediction System – Django [\(Github\)](#) May 2025 - Jul 2025

- Designed a weather forecasting application using ML models trained on historical datasets.
- Achieved 85%+ accuracy in predicting temperature and humidity by combining real-time inputs with trained models.

Farmax Agro – AI-Driven Sustainable Farming Platform [\(Github\)](#) Jun 2025 - Present

- Analyzed a multi-agent AI system using Node.js, ML models, and MongoDB to optimize farming practices and reduce resource usage by 30%.
- Implemented real-time weather prediction and crop recommendation for sustainable agriculture.

Achievements & Certifications

- Smart India Hackathon (Top 5% Finalist):** Led full-stack AI project in Healthcare/Agritech [\(Certificate\)](#)
- LeetCode:** Solved 160+ data structures and algorithms problems to strengthen coding proficiency [\(Profile\)](#)
- IBM SkillsBuild:** Certifications in Cloud Computing and Web Development Fundamentals. [\(Link1\)](#) / [\(Link2\)](#)
- Oracle & MongoDB:** Certified in SQL and MongoDB. [\(SQL & MongoDB\)](#)
- Python, C++ IIT Bombay:** Completed 30+ hours of training in OOPs with strong conceptual understanding. [\(Link1\)](#) / [\(Link2\)](#)
